SERVICES

- Design Review
- Simulation and modeling
- Material Testing
- Qualification
- Component Testing
- Product testing / Validation
- Failure Analysis
- Education and training

CAPABILITIES

- **Development** of RF and Microwave Components, Modules and Systems (Active and Passive)
- **Design Support Services**
ECAD, MCAD, System Design
- **Product Development Support Services**
ECAM, ECAE, MCAM, MCAE (In-House)
- **Analysis Services**
3D EM, Signal Integrity, Electrothermal Studies (Fatigue, Thermal Management, Heatsink Design, CFD Studies)
- **Manufacturing Services**
- **Logistics Services**
- **Qualification Services**
- **Project Management Services**

CORE INNOVATION IN HIGH POWER RF/MICROWAVE

E-REON is a world class RF/Microwave Solutions Company.

Our core business focuses in the design and development of High Power RF/Microwave hardware (Active and Passive) for Commercial, Industrial and A&D markets. Ranging from low power exciters to multiKW power amplifier systems for Industrial Heating and RF Energy applications, our product portfolio and services cover a wide spectrum of applications and Markets.

It is our Mission here at E-REON to always turn quality and innovation into Customer satisfaction.
